8 September 1955

## MEMORANDUM

FOR: Chief, HARVARD

FROM: Chief, Medical Office

SUBJECT: CABALETTA-2 - Medical Exam done on 6 September 1955

1. Past History: 1944 shrapnel wound in the left thigh and right posterior chest. Fragment removed from the chest, but fragment is still present in the thigh. No difficulties from this wound at the present time.

2. Physical Examination: Height 69 inches, weight 175 lbs, blood pressure 130/90, pulse 80. Vision and hearing normal. General physical examination is essentially normal except for mild varicosities of right lower leg and old scar on the left thigh and right posterior chest, secondary to shrapnel wound.

3. Laboratory Studies: Urinalysis normal, serology negative and x-ray of the chest negative.

4. Disposition: Subject appears to be in good general physical health at present time. He was given a psychiatric examination on 23 February 1955 and at that time was found to be psychiatrically qualified for continued processing for emigration to the United States.
